

What You Need to Know

One of the many benefits of living at Waterlin is Current, the community's built-in connectivity service designed to keep residents connected at home and around the community.

Powered by Centric Fiber, Current delivers ultra-fast fiber internet through a state-of-the-art Fiber-to-the-Home (FTTH) network built throughout Waterlin. WiFi connectivity at home and throughout the community, along with dedicated local support, make staying connected simple.

Unlike traditional cable or copper-based networks, this all-fiber network provides exceptional speed, reliability, and capacity, while offering environmental benefits such as lower energy consumption, a longer lifespan, and greater resilience in Florida's climate.

Through Current, every Waterlin home includes ultra-fast 2 Gbps symmetrical internet service and in-home WiFi as part of Property Owners Association (POA) dues, making connected living part of everyday life from day one.

More Than Fast Internet

With Current's 2 Gbps internet service, residents can:

- Stream 4K and 8K video on multiple devices simultaneously with minimal buffering
- Work from home with smooth, reliable video conferencing
- Upload large files quickly and efficiently
- Connect smart home devices including cameras, doorbells, thermostats, and security systems
- Enjoy responsive online gaming with ultra-low latency
- Back up photos, videos, and important files to the cloud with ease

Built for What's Next

Designed for today and ready for tomorrow, Current provides the bandwidth and flexibility to support evolving technology and future innovations for years to come.

A fiber-optic strand no larger than a human hair delivers powerful connectivity directly to every home, creating a strong foundation for connected living throughout the community.

In addition to in-home connectivity, Current also includes community WiFi in key gathering spaces throughout Waterlin, helping residents stay connected beyond their front door.

Homes Built for Connected Living

Every home in Waterlin is designed to support today's connected lifestyle and tomorrow's emerging technologies. Homes are wired using industry-standard low-voltage infrastructure, including high-performance Category 6 (CAT6) cabling, to deliver reliable communication, entertainment, and internet connectivity throughout the home.

In addition to high-capacity wiring and components, each home includes a centralized service center that simplifies the configuration and management of both wired and wireless technologies.

This infrastructure creates a flexible foundation for everything from remote work and streaming to smart home devices and future technology upgrades. For homeowners interested in customized technology solutions such as home automation, home theaters, distributed audio, lighting controls, security systems, or advanced networking, additional options may be available through your builder.
